SKILLS

Code

Java
Python
HTML
Processing

Design

Photoshop
Illustrator
InDesign
Lightroom
After Effect

PLAY

DESIGN EXPERIENCE

Space Simulator

Winter 2020

Coded a interactive program for a Multimedia Programming course using Java. I designed the program system using UML making sure that my code follows strict encapsulation and design patterns such as factory, and decorator patterns. I also created custom graphic images and animations to create a uni-formed theme,

Branding & Identity

Spring 2020

Created logo's for a company to manifest a corporate identity by using correct contrast and Gestalt design principles in a Graphic Design course. To ideate, I brainstormed by creating brain maps and brain dumped for various sketch ideas. The final logo chosen was then transferred to digital mediums through Adobe Photoshop and Illustrator. I coloured the logo in a greyscale pallet that held sensible contrast for real-life applications.

WORK EXPERIENCE

Server: (Sango & Kisoji)
